Theories of Personality Duane P. Schultz, Sydney Ellen Schultz, 2001 This revision of the Schultz's popular text surveys the field, presenting theory-by-theory coverage of the major theorists who represent the psychoanalytic, neopsychanalytic, life-span, trait, humanistic, cognitive, behavioral, and social-learning approaches, as well as clinical and experimental work. Where warranted, the authors show how the development of certain theories was influenced by events in a theorist's personal and professional life. This thoroughly revised Seventh Edition now incorporates more examples, tables, and figures to help bring the material to life for students. The new content in this edition reflects the dynamism in the field. The text explores how race, gender, and culture issues figure in the study of personality and in personality assessment. In addition, a final integrative chapter looks at the study of personality theories and suggests conclusions that can be drawn from the many theorists' work.

Theoretical Models and Personality Theory, Edited by David Krech And George S. Klein David Krech (Ed), George Stuart Klein, 1952

Personality Theories Willard B. Frick, 1991-06-15 The author has revised this popular experiential workbook by adding Carl Jung and Karen Horney to his cast of major personality theorists -- Freud, Adler, Erikson, Bandura, Allport, Maslow, and Rogers -- who provide the context within which students explore aspects of their private experience. Through exercises, projects, and group activities, students are given the means to relate abstract theories and concepts to their own personality development and experience. Many exercises deal with private aspects of students' lives and are designed to be completed individually out of the classroom and reviewed by the instructor. Other classroom exercises involve working with peers in small-groups.

Theories of Personality Magnavita, 2002-06 Balanced and Comprehensive Coverage of Modern Theories of Personality Over the last two decades, the study of personality has grown and expanded at a rapid rate. The era of contemporary

personality theory has been ushered in-fueled in the last quarter of the twentieth century by advances in the fields of psychology, psychiatry, genetics, psychopathology, computer technology, and neuroscience. Jeffrey Magnavita, one of the leading new scholars in the field of personality theory, offers a rich and balanced text on the evolution of personality theory. Students travel through the historical underpinnings of personality theory beginning with the early Greek theoretical models, which are followed by the later nineteenth-century attempts at establishing scientific psychology. Magnavita highlights the genesis of modern scientific personality theory that started with Freud and progressed through the work of Freud's disciples and the controversy they sparked. This sets the stage for the primary focus of the text-illustrating the contemporary, interdisciplinary approach to personality theory through the analysis of seven major contemporary models of personality: * Psychobiological Models of Personality * Contemporary Psychoanalytic Models of Personality * Behavioral Models of Personality * Cognitive Models of Personality * Interpersonal and Factorial Models of Personality * Relational Models of Personality * An Integrative Model of Personality Each chapter covering these seven models begins with a review of the main historical figures, followed by a presentation of the current theory. The philosophical foundations and assumptions; notions of normal vs. abnormal; assessment strategies and tools; ways cultural and gender differences are understood; strengths and limitations; and applications of each model are offered. The final section covers model applications, continuing research, and future directions of the field-providing students an active sense of evolution and process that makes this a unique and current learning tool.

An Introduction to Theories of Personality Robert B. Ewen, 2014-01-21 This 7th Edition helps students unravel the mysteries of human behavior through its highly readable introduction to the ideas of the most significant personality theorists. Engaging biographical sketches begin each chapter, and unique capsule summaries help students review key concepts. Theories come alive through the inclusion of quotations from the theorists' writings and numerous applications such as dream interpretation, psychopathology, and psychotherapy. Significant changes in the 7th edition include an extended discussion of the practical applications of personality theory, with an emphasis on guidelines that can help people increase their self-knowledge, make better decisions, and live more fulfilling lives. Fictionalized but true-to-life examples illustrating the perils of inadequate self-knowledge include college students, parents, terrorists, business executives, and politicians, while other examples show the positive outcomes that can result from a better understanding of one's unconscious. This 7th edition also includes a more extensive discussion of how a lack of self-understanding caused difficulties for such noted theorists as Freud and Erikson, and a new section that explains how behavior can be strongly influenced by the situation as well as by one's personality. Finally, a new interactive web site provides practice test questions and other topics of interest.

An Introduction to Theories of Personality B. R. Hergenhahn, 1984 This introduction to the theories of personality introduces readers not only to the rich history of psychology but to practical information that helps them understand their own lives and their relationships with other people. Using a theorist-by-theorist approach, the book summarizes the major theories of personality and emphasizes that the best understanding of personality derives from a variety of viewpoints. Thus, theories representing the psychoanalytic, sociocultural, trait, learning, sociological, and existential-humanistic paradigms are offered as different yet equally valid ways of approaching the study of personality. Includes a series of experiential exercises. What Is Personality? Sigmund Freud. Carl Jung. Alfred Adler. Karen Horney. Erik H. Erikson. Gordon Allport. Raymond B. Cattell and Hans J. Eysenck. B. F. Skinner. John Dollard and Neal Miller. Albert Bandura and Walter Mischel. Edward O.

Wilson. George Kelly. Carl Rogers. Abraham Maslow. Rollo Reese May. For anyone wanting a comprehensive understanding of personality and individual differences.

Theories of Personality Richard M. Ryckman,1993 Ryckman (U. of Maine) intends his textbook to be accessible to undergraduates who have had little or no previous exposure to personality psychology. He reviews the basic concepts and principles of the major theories of personality and assesses how well they meet criteria for judging their scientific worth. He also introduces research studies that test the validity of the theories, presents issues that challenge contemporary personality psychologists, and discusses some of the major trends in theory and research.
